Education

•Vellore Institute of Technology, Vellore *BTech degree: 2024*
Computer Science Engineering Specialization in Data Science CGPA: 8.54

•Alpine Public School, Bengaluru *12th Standard: 2020*
Central Board of Secondary Education Percentage: 94.8

Technical Skills and Interests

Languages: Python, Java, R, SQL, JavaScript, C++, HTML, CSS
Frameworks: Apache Spark™, PyTorch, Langchain, Rdflib, Holoviews, NLTK, OpenCV, Matplotlib, GridsearchCV, Numpy, Pandas
Tools: GitHub, MySQL, Microsoft Power BI, Adobe Photoshop, Adobe Premiere Pro
Electives: Machine Learning and AI, Natural Language Processing, Cloud Computing, Networking, Databases

Technical Experience

•Databricks - *Full-time Employment* *July 2024 - Current*
Associate Technical Solutions Engineer, Bangalore
- Subject Matter Expert (SME) in Apache Spark™ and Delta Storage.
- Optimised the workloads of clients by reducing the running time by 80 per cent.

•Databricks - *Internship (click for certificate)* *Jan 2024 - June 2024*
Intern Trainee Engineer, Bangalore
- Got familiarised with the concept of Apache Spark™ and Big Data.
- Learnt real-life customer use cases of companies using big data in their day-to-day life.

•Ideas2IT - *Summer Internship (click for certificate)* *May 2023 - July 2023*
Data Science Intern, Chennai
- Designed and implemented the Personalized Campaign Email Generator to enhance automation of email content generation and CRM for a B2B custom software development company.

Research Paper

•BERT based Citation Recommender and Impactful Nodes Identifier in RDF Knowledge Graphs
Knowledge graph for Research papers and a Recommendation system, allowing easier navigation of academic literature.
- This study presents the development of a structured RDF-based knowledge graph and a research paper recommendation system, enabling semantic visualization of academic relationships, context-aware paper suggestions, and data-driven identification of high-impact publications within the scholarly corpus.

Personal Projects

•Face Mask Detection - DEEP LEARNING AND COMPUTER VISION - (April 2023 - May 2023)
Detection of face masks on individuals through a system empowered by PyTorch and a pre-trained ResNet50 model.
- Tech Stack: Python, PyTorch, torchvision, OpenCV, MTCNN, NumPy, Pillow, Matplotlib.
- Face mask classification either from a saved file or in real-time with accuracy of 96 percent ensuring adherence to safety protocols like wearing masks is paramount for public health.

•Langchain Food Recommender - LARGE LANGUAGE MODELS - (June 2023 - July 2023)
A custom made PDF document is divided into chunks, embedded, and queried using Human language and a Chatbot.
- Tech Stack: Python, Langchain, Transformers, HuggingFaceEmbeddings, FAISS, OpenAI, ipywidgets, Pandas, Matplotlib
- Project computes vector embeddings, stores in a vector database and performs semantic search on the document.

Certifications

•Databricks Certified Generative AI Engineer Associate *Certificate Link*
•Databricks Certified Data Engineer Associate *Certificate Link*
•IBM Artificial Intelligence Analyst *Certificate Link*

Volunteering Experiences

•Learning and Empowerment Volunteer, Becoming I Foundation (BIF-VIT) *Teacher/Professor*
•Cryptic Hunt - Gravitas Event, Association for Computing Machinery (ACM-VIT) *Manager of the event*
•Blood Donation Camp, Youth Red Cross (YRC-VIT) *Manager of the event*
